

ARRL Call For Technical Manuscripts

Call for Manuscripts: Share your technical insights on your Field Day setups and Emergency Communications activities.

QST invites submissions of technical manuscripts from licensed amateur radio operators for upcoming issues focused on **ARRL Field Day and Emergency Communications operations**. We're looking for educational, how-to pieces that help fellow hams improve their setups, strategies, and technical know-how.

What We're Looking For:

- Innovative or proven techniques for emergency preparedness and response.
- Technical solutions for Field Day operations—power, antennas, logging, digital modes, etc.
- Integration of new technologies (e.g., SDR, mesh networking, solar power) in field scenarios.
- Examples of how the popularity of Parks on the Air (POTA) portable activations has changed your approach to setting up Field Day and EmComm stations.
- Examples of how portable antennas and LiFePO batteries have replaced base station antennas and generators.
- Manuscripts should have a strong “how-to” component. Tell us what you did, but more importantly, tell us how you did it.

Submission Guidelines:

- **Audience:** Licensed amateur radio operators.
- **Length:** 1,000 –1,800 words, plus high-resolution images with caption and photo credit information (name and call sign of photographer).
- **Tone:** Educational and collaborative—share what works!
- **Format:** Plain text or Word document.
- **Deadline:** January 31, 2026
- **Submit to:** qst@arrl.org

Why Contribute? Your article could be published in *QST*, ARRL's membership journal, which reaches thousands of fellow amateurs across the country and beyond. It's a great way to give back to the community and inspire others with your experience.
